

# FILTERS, REGULATORS & LUBRICATORS

Coilhose offers filters, regulators and lubricators to meet hundreds of application requirements. Our line included a full range of connection sizes, flow capacities, pressure ranges and filtration levels.

## MINIATURE SERIES

This series is designed for applications where space is limited and flow requirements are low. The units are ideal for control panels and miniature circuitry and each unit can be disassembled by hand.

## 26 SERIES

The 26 Series offers a great balance of compact size and optimum flow. This series is perfect for applications where performance, small size and Low cost are important. Regulators can be configured with gauges, different pressures ranges and mounting options. The filters and lubricators can be configured with metal bowls and filtration levels.

## 27 SERIES

The 27 Series is engineered to provide exceptional design and installation flexibility. Regulators have a multitude of pressure and gauge options. The filters and lubricators can be configured with metal bowls and various filtration levels.

## 29 SERIES

The 29 Series is made from lightweight aluminum bodies which lend themselves to a variety of applications. The modular design of the 29 Series allows for the installation and servicing of components without disturbing the plumbing surrounding it.

## GENERAL PURPOSE SERIES

This series offers a broad range of port sizes (1/4" to 2") for a reliable interchange with other manufacturers. The units are manufactured with zinc die cast bodies and are available with plastic bowls with guards or metal bowls.

# FILTERS, REGULATORS & LUBRICATORS

## HEAVY DUTY 88 SERIES

These units have a long-established reputation for high quality and reliability. Sizes range from 1/4" to 1". Features Include die cast aluminum bodies and extra large filter elements. These FRLs are also easy to maintain.

## DESICCANT DRIERS

Desiccant Driers use chemical reactions to remove the smallest traces of moisture from compressed air systems. Less than 1 psi pressure drop and no power source required.

## IN-LINE SERIES

Coilhose's In-Line Series filters, regulators and lubricators are designed to increase air tool efficiency by providing filtration, regulation and lubrication right at the tool. These units are perfect for maintaining and protecting your tool investment.

## IN-LINE FILTERS

In-Line filters protect and extend the life of tools. These units are serviceable, can be easily cleaned and are lightweight and compact so they are ideal for point-of-use installation immediately upstream of air tools.

## IN-LINE PRESSURE REGULATORS (PRE-SET AND ADJUSTABLE)

These regulators are designed to protect intermittently-operated air tools against damage caused by over-pressurization. The Pre-Set model is preset at the factory for tamper-proof operation. The Adjustable model allows the user to select a desired pressure and lock the setting in place.

## IN-LINE LUBRICATORS

These lubricators provide at-the-tool lubrication to keep tools running at peak efficiency. These units are an effective alternative to larger, more costly models that may not deliver adequate lubricant to the tool due to excessive line length. A filtration screen prevents line debris from contaminating oil.
