

# PLASTIC TUBING

## POLYURETHANE TUBING

Polyurethane is extremely flexible, resistant to kinking and withstands fuels and oils. A variety of colors in standard and metric sizes are available.

## MULTI-COLOR RIBBON TUBING

MCR Tubing is a cost effective method of routing two or more tubing lines. Made from 95 durometer Polyurethane, MCR can be installed faster than other jacketing options.

## NYLON TUBING

Nylon is best in applications requiring a lightweight, tough, chemical-resistant tubing. Six stock colors in standard and metric sizes are available.

## POLYETHYLENE TUBING

Polyethylene is one of the most popular choices for low pressure tubing due to its resistance to most chemicals and solvents, its flexibility and its economical cost.

## TUBING CUTTERS

These tubing cutters provide a square cut without deforming the tubing to allow a more secure connection into the fitting. They are durable enough to cut hard plastic tubing, yet lightweight and compact.

## HOSE CUTTERS

These hose cutters will accurately and easily cut out hose or tubing up to 1 1/4" diameter. The corrosion-resistant heavy steel blade provides a clean and straight cut, even on braided hose.
