

COUPLERS & CONNECTORS

COILFLOW™ SIX BALL COUPLERS

The Coilflow Six Ball Couplers feature six stainless steel locking balls to provide a more precise and secure connection. The larger contact area provided by the six balls allows for minimal movement between the coupler and the connector. This configuration provides a more durable coupler, even in high vibration conditions. Available in Manual and Automatic.

COILFLOW™ MANUAL COUPLERS

The Coilflow couplers are engineered to connect to all connectors of a matching interchange. They are composed of brass or plated steel.

Hose Barb

COILFLOW™ AUTOMATIC COUPLERS

The Coilflow Automatic Couplers allow for easy one handed connecting and disconnecting. They feature a rugged brass body, and are compatible with all connectors of the same interchange.

BALL SWIVEL CONNECTORS

When installed in a tool, the Ball Swivel Connectors allow for a larger range of motion and less fatigue on the user. These fittings also feature steel ball and socket construction which prevents galling and ensures a long service life. These units are available with Industrial, Automotive, Aro and Megaflow™ Interchange connector ends.

MEGAFLOW™ SERIES

This series is engineered to allow twice the flow of comparably-sized standard design couplers and connectors. Couplers feature a one-handed push-to-connect design. Ball swivels and composite couplers are also available in this series.

COUPLERS & CONNECTORS

5-IN-1 SAFETY EXHAUST COUPLER

The 5-in-1 allows for one coupler to connect to five interchanges. Designed to disconnect under zero pressure, this coupler avoids the dangerous and dreaded rush of air and whipping hose.

Note: In 3/8" and 1/2" body sizes, the Safety Exhaust Coupler works ONLY with the Industrial and Automotive Interchanges.

STRAIGHT THROUGH SERIES

These couplers and connectors contain no internal valving that reduce flow through the connection. Ideal for fluid transfer lines and carpet cleaners.

COMPOSITE COUPLERS

These non-marring couplers are manufactured out of a heavy-duty, high-impact fiberglass composite, which protects finished surfaces from scratching and marring. Available in three varieties: Industrial, Safety Industrial and Megaflow™.

MICRO SERIES

These miniature quick disconnects are ideal for applications where space is limited, such as instrumentation, laboratory, chemical, medical and miniature pneumatics. Available in valved or straight through configurations.
