

Cautionary Statement & Liability Disclaimer

PLEASE READ

The information and specifications furnished in this catalog are a guide to help recommend product for a particular application and compare properties of different materials. Anchor Rubber Products, LLC disclaims liability for results or use of this information which is furnished without charge. We suggest that samples and products be obtained and tested when determining suitability of material and product for a particular application.

Temperature ranges and product attributes are often approximations and generalizations of a particular elastomer. This data can vary within an elastomer based on different formulations, compounds and manufacturers.

Working pressure decreases as temperature increases. Pressure rating can only be obtained with proper coupling procedures. The pressure ratings of hose assemblies can be affected by the type of fitting used and the coupling procedure. We cannot be responsible for the suitability of the user's fittings or the coupling method used.

Because of continual efforts for product improvement, we reserve the right to alter specifications without prior notice. We believe this information to be accurate but cannot be responsible for any omissions or errors.
